

Caribou Biosciences to Participate in Upcoming Investor Conferences

November 20, 2024

BERKELEY, Calif., Nov. 20, 2024 (GLOBE NEWSWIRE) -- [Caribou Biosciences, Inc.](#) (Nasdaq: CRBU), a leading clinical-stage CRISPR genome-editing biopharmaceutical company, today announced Rachel Haurwitz, PhD, Caribou's president and chief executive officer, will participate in the following investor conferences:

- **Citi's 2024 Global Healthcare Conference**, Miami, FL
December 3, 2024, panel at 2:30 PM EST
Panel title: Cell therapies in autoimmune disorders
[Webcast](#)
- **7th Annual Evercore ISI HealthCONx Conference**, Coral Gables, FL
December 4, 2024, fireside chat at 10:25 AM EST
[Webcast](#)

For more information, visit the [Events](#) page on Caribou's website. Webcasts will be available on the Caribou website for 30 days after the event.

About Caribou's novel next-generation CRISPR platform

CRISPR genome editing uses easily designed, modular biological tools to make DNA changes in living cells. There are two basic components of Class 2 CRISPR systems: the nuclease protein that cuts DNA and the RNA molecule(s) that guide the nuclease to generate a site-specific, double-stranded break, leading to an edit at the targeted genomic site. CRISPR systems are capable of editing unintended genomic sites, known as off-target editing, which may lead to harmful effects on cellular function and phenotype. In response to this challenge, Caribou has developed CRISPR hybrid RNA-DNA guides (chRDNA; pronounced "chardonnays") that direct substantially more precise genome editing compared to all-RNA guides. Caribou is deploying the power of its chRDNA technology to carry out high efficiency multiple edits, to develop CRISPR-edited therapies.

About Caribou Biosciences, Inc.

Caribou Biosciences is a clinical-stage CRISPR genome-editing biopharmaceutical company dedicated to developing transformative therapies for patients with devastating diseases. The company's genome-editing platform, including its Cas12a chRDNA technology, enables superior precision to develop cell therapies that are armored to potentially improve activity against disease. Caribou is advancing a pipeline of off-the-shelf cell therapies from its CAR-T platform as readily available treatments for patients with hematologic malignancies and autoimmune diseases.
